

U-Cocktail

No more juggling. Eat with style.

U-cocktail plates are created to better serve users at cocktail parties. A slot is assigned to a ceramic plate which functions as a wine glass holder. This enables the users to conveniently use the other free hand to hold a fork or spoon and enjoy socializing.

Ureka is designed specifically for cocktail functions and for wine drinkers. Where as, Uvonda and Unikorn can also be used with a tumbler glass and with a coffee cup in the events such as coffee breaks at seminars, meetings or trainings.
